Premier Consulting Partner

- Migration Competency
- MSP Partner
- Public Sector Partner
- SaaS Competency
- Well-Architected Partner Program

Achieve your objectives more quickly with Staff Augmentation Services:

- **Accelerate time-to-market** by augmenting your in-house engineering team.
- **Close your team's skills gap** with AWS-certified engineers with specialized skill sets.
- **Manage costs without sacrificing feature velocity** — flexibly ramp up or scale down your engineering team when needed.

What is staff augmentation?

Staff augmentation is the use of outside resources on a flexible basis to enhance an organization's capacity to achieve its objectives more quickly with:

- **Short-term resources** — skills to complete a project, scale up during a peak season, or fill gaps when your in-house team is on vacation or leave.
- **Long-term resources** — to fill a skills gap, cut operational costs, or when the in-house hiring process just takes too long.

Why nClouds?

AWS expertise

nClouds is an AWS Premier Consulting Partner, delivering award-winning AWS and DevOps consulting and implementation services to our clients. We work with a broad range of businesses across all industries – from pre-production startups to growth-stage and enterprise organizations.

Top engineering talent

Our skilled engineers are dedicated to helping our clients achieve great things. They have earned more than 100 certifications and 150 accreditations, including advanced certifications like AWS Certified Solutions Architect - Professional, AWS Certified DevOps Engineer - Professional, and AWS Certified Big Data - Specialty.
